 Family practice, a new specialty, Darley (Dec., Part II), 142
 Implications of specialism for medical education, Wolfe (Dec., Part II), 35
 Specialty teaching to undergraduates, *see* Artusio (April, Part II), 12
See also Medical Education, Pediatrics, Psychiatry, Specialty Boards, Surgery

Specialty Boards:
 Need for revision of requirements: A surgeon's view, Gibbon (April, Part II), 103
 A Radiologist's view, Rigler, *Ibid.*, 108
 Role in postgraduate education, *see* Darley (April, Part II), 89; Hubbard, *Ibid.*, 94

Studies and Surveys:
 Of Alumni, U.S. medical school (survey, supp. by U.S. Dept. of Health, Education and Welfare, Division of Public Health Methods), Stewart and Pennell, 1612
 Of Applicants, 1959-60 (A.A.M.C.), Hutchins and Gee, 289
 On beliefs and attitudes, religious, of senior medical students, Knight, 1557; On beliefs, medical student, about human nature (New Zealand), Hill, 1120
 Of clerkship and internship (A.A.M.C.), Gee (April, Part II), 34; Of university hospital internship 1960 (Kellogg Foundation), Saunders, 561
 On Comprehensive care for handicapped children (Sister Elizabeth Kenny Foundation), Glaser *et al.*, 1283; On comprehensive medicine teaching (Duke Univ. Center for the Study of Aging, and U.S.P.H.S. grant supp.), Shaw *et al.*, 148; On student attitudes toward

comprehensive medicine programs (Kellogg Foundation), Miller and Erwin, 422

Changes in professional careers of physicians (resurvey of 1935, 1940, and 1945 graduates, U.S.P.H. grant), Weiskotten *et al.*, 1565

On drug evaluation program, in psychiatry (U.S.P.H.S. grant, and American Fund for Psychiatry), Ward and Rickels, 410

On examinations, objective, reliability and validity of, Murphree, 813

Of the financial situation of the American medical student (A.A.M.C. survey), Whiting *et al.*, 745

Of graduates, 1960 Medical School (A.A.M.C.), Hutchins, 322; Of 1960 medical school graduates' biographical history (A.A.M.C.), Schumacher, 398

On graduates, high school, new integrated program for talented, (Markle Foundation), Cooper and Prior, 80

On medical students' literacy in mathematics (Univ. of California School of Public Health), Hopkins and Berry, 338

On MCAT, *see* Medical College Admission Test

On performance, undergraduate, intellectual factors in (Canada, Dominion-Provincial Mental Health Grant), Schwartzman *et al.*, 353; On development of objective measures of medical student chemical skills (Commonwealth Fund of New York), Cline, 908; On medical student diagnostic skills (Commonwealth Fund of New York), Rimaldi, 73; On development of clinical judgment, as function of psychiatric training, Salzman and Goldstein, 914; On study difficulties in medical students (Dominion-Provincial Mental Health Grant), Hunter and Schwartzman, 1295

Of pharmacology, state of graduate education in (N.I.H. Grant), Pelikan and Unna, 1266

Of premedical students abandoning medical career plans (Harvard Milton Fund, and Rockefeller Foundation), Funkenstein, 924

On role of postdoctoral fellowships in academic medicine (Markle Foundation, U.S.P.H.S. Grant), Cain and Bowen, October, Part II, 1353-1556

On quality of patient care, evaluation of, Crosbie and Gilberstadt, 1310

On teaching methods, evaluation of, in allergy (Education Committee of the American Academy of Allergy), Mathews and Milholland, 229; in pharmacology (U.S.P.H.S. Grant), Dixon *et al.*, 68; On efficiency of TV in traditional lab demonstrations (Fund for Research in Psychiatry, New Haven, Conn.), McGuire *et al.*, 715

On university clinic, role of, in referral process (U.S.P.H.S. Grant), Williams *et al.*, 899

Surgery:
See A.A.M.C. Report of the Second Institute on Clinical Teaching, April, Part II, 3-199, *also* a surgeon's view on specialty boards, Gibbon (April, Part II), 103

See also Specialization.

Surveys: *See* Studies and Surveys, *also* Questionnaires

Teaching Methods:
 Approaches to comprehensive medicine teaching, Shaw *et al.*, 148
 Audio-Visual: A.A.M.C. Committee Report, *see* Proceedings for 1960, 503; Construction and use of a working model in embryology, Andrew, 892; Description of a mechanical learning aid in pathology, Myhre, 1634; New techniques with TV, stereo, and two-person interview, Moore *et al.*, 162; Use of TV for traditional lab. demonstrations, McGuire *et al.*, 715; Use of intermediary magnification in pathology, Angrist, 815
 Classroom demonstrations in pharmacology, Dixon *et al.*, 68
 Clinical method in psychology, Rodger and Mowbray, 167
 Evaluation of methods in allergy teaching, Mathews and Milholland, 229
 Experimental course in psychotherapy, Ornstein, 154
 Interdepartmental approaches, Mills, 188; Ruhe and McLain, 247
 The lecture in 4th-year teaching, Stead (April, Part II), 85
 Regarding instruction in physician-patient relationship, *see* Schumacher and Gee (April, Part II), 155
 Teaching device in psychiatry (double-blind drug study), Ward and Rickels, 410

World Health Organization (WHO):
 Role in medical education, Grzegorzewski, 971; Rao, 233
 Participation in international pediatric training, *see* Wegman, 38
